

NS-60W/B Low-profile LED security light specifications

NIGHT SABRE™

NightSabre low profile security lights deliver the very latest in high brightness LED technology in a sleek and discreet weatherproof form. At only 32mm high these beautifully crafted aluminium devices can fit under a windowsill, above a door or under the eaves of a roof.

Capable of detecting human movement up to 9m away, once triggered 1400 lumens illuminates a wide area with a bright even beam. As an additional deterrent there is a flashing red LED warning light to indicate the presence of an active security device. An integrated photocell ensures the lights operate only after dusk.

The light is powered by a plug in power supply (included) and the power lead can be easily routed through a window opening or through a small hole in the wall or eaves. Installation is quick and simple and there is no need for any adjustments or maintenance – Night Sabres are guaranteed for 2 years. Replacing incandescent bulbs with LED units lowers greenhouse gas emissions and saves electricity – the LEDs will last 10-20 years depending on use, so there is a very low total cost of ownership.

- Digital PIR motion sensor
- Flashing warning LED
- Dusk/dawn sensor
- Ultra-bright LEDs
- Aluminium alloy
- Discreet design

Voltage	12vDC 1.0A	Operating temperature	-20°C to +50°C
Power	1400 Lumens	Weight	425g
Range	Up to 9m	Energy rating	A+
Detection zone	120° H x 90° V	LED lifetime	30,000 Hours
Recommended mounting height	2 - 4.5m	Versions	NS-60W - White NS-60B - Brown
Dusk point	20 Lux	LED Colour	4000K
Weatherproof rating	IP-65	Approvals	FCC, CE, RoHS
Dimensions	580mm x 32mm x 30mm	Accessories	DS-2MC - 2m extension cable
